Links between study programme outcomes, course outcomes and criteria of learning achievement evaluation

Study programme outcomes	Course outcomes	Criteria of learning achievement evaluation
<p>1.To evaluate critically theories of career designing and other related sciences as well to apply them for systemic analyses of career designing phenomena</p> <p>4. To design vocational career research projects, corresponding to the needs of education and labour market organizations to get original data about state of art of vocational information, counselling as well as career planning activities</p> <p>8. To apply ethical principles for informing and counselling, performing research on cognition of person, professions and</p>	To formulate main parameters of the research	Research parameters and their consistency were demonstrated
	To choose and to apply adequate research methods	Applying of adequate research methods were demonstrated
	To implement and to present results of the research	Ability of implementation of research and presentation of results
	To formulate conclusions	Ability to formulate conclusions was demonstrated
	To format the Research project in accordance with requirements	Research Project is in accordance with requirements

labour market as well as designing information and counselling plans	To prepare table of authorities in accordance with requirements	Table of authorities is in accordance with requirements
--	---	---

Link between course outcomes and content

Course outcomes	Content (topics)
To formulate main parameters of the research	Criteria of parameters formulating
To choose and to apply adequate research methods	Research methods in Social sciences and consistency with parameters
To implement and to present results of the research	Main principles of research implementation. Ethics of research
To formulate conclusions	Criteria of conclusions formulating
To format the Research project in accordance with requirements	Requirements of Research Project formatting
To prepare table of authorities in accordance with requirements	Requirements of Research Project table of authorities

Study (teaching and learning) methods

Consultations, self-studies

Methods of learning achievement assessment

Presentations of prepared Research Project II

Distribution of workload for students (contact and independent work hours)

Consultations - 4 hours

Student's independent work – 135 hours

Presentation and defence – 6 hours

Structure of cumulative score and value of its constituent parts

Final paper of Research project II – 50%, presentation of results – 30%, defence – 20%.
