

## **FIRE SAFETY REQUIREMENTS**

**In case of fire** immediately report about the fire by calling the emergency number - **112**

Teo - **01**

Omnitel - **101**

Bitė and Tele2 - **011**

Please, provide full address, causes of the fire and fully respond to the questions asked.

## **RESIDENTS OF THE DORMITORY!**

**Please, comply with fire safety rules:**

- Do not use electric heating appliances, electric kettles, irons, water heating appliances, or microwaves in your room;
- Before going to sleep and/or leaving the room, turn off all electric appliances and unplug power plugs (except the devices that have to be plugged in, for example, refrigerator);
- Use all electric appliances which comply with fire safety standards and do not incur the risk of fire;
- Do not leave easily flammable items (for example, candles, incense sticks, etc.) unattended;
- It is forbidden to neutralise fire-alarm systems. They must always be in a working condition and operate correctly, as shown in the picture below:

- Do not take to or keep in your room the substances which may cause fire;
- It is strictly prohibited to smoke in your room as well as other common areas. You may smoke only in specially designed areas, which are marked by a special sign, as shown in the picture below:

- Do not throw cigarettes and/or cigarette stumps through windows/balconies; do not throw them into the trash bins that are designed for paper/plastic, use metal bins or ashtrays instead;

- Get familiarised with emergency evacuation plan (remember the stairwell line-up and the exits).

#### **In case of fire in the kitchen:**

- If grease or cooking oil has caught on fire, cover the pot with a metal lid; do not pour water on hot grease;
- Turn the heat off;
- Close the windows and doors and inform the administration about the accident;

#### **In case of fire in your room:**

- Immediately report about the accident by calling the emergency number **112**, also inform the dormitory's administration about the fire;
- If you cannot handle the fire yourself, leave the room, close the door but do not lock it;
- Leave the dangerous area and act in accordance with the instructions of the dormitory's administration and/or fire brigade;
- Keep the key to the room in such place where all residents of the room could find it;
- Warn other residents about the accident by shouting "Fire" and try to leave the building as soon as possible.

#### **In case of fire in common areas or other rooms:**

- Immediately report about the accident by calling the emergency number **112** and also inform the dormitory's administration about the fire;
- If the area is filled by smoke, cover your mouth and nose with a wet cloth and walk or crawl as close to the ground as possible;
- Leave the room and close the windows and doors;
- If your exit is blocked by fire, it may be safer to stay inside and wait for the fire brigade to arrive. Close the door and cover all of the spaces with wet cloth in order to avoid smoke. Stay by the window and call for help;
- While evacuating, make sure that the door is not hot by touching all closed doors with the back of your hand. If a door is hot, do not open it – it means there is fire on the other side of the door;
- Use your telephone to inform the dormitory's administration about your location;
- You may protect yourself by staying in balconies or loggia (after entering the balcony you must close the door);
- While evacuating do not use elevators, use the stairs instead;
- In case of fire, keep safe distance from glass partitions or stands.

**Persons, who have violated these and other fire safety requirements and other normative documents, will have to take all the responsibilities according to the laws of the Republic of Lithuania and internal rules of the dormitory.**
