The following criteria are applied in both stages of enrollment:

- Higher year of studies** (priority is given to senior students);
- Average of penultimate semester (2018 autumn) marks** (priority is given to students who have a higher average; for first-year students – higher competitive score).

Over the course of enrollment, students must check:

- If their name is included in the subject of their priorities;
- If other students with higher marks “have not pushed you out” of the subject.

In the second stage, a student with higher priority shall not push out a student with lower priority who enrolled in the first stage; it is noteworthy that should a student remove himself/herself from a study subject, he/she will not get the same place should he/she want to re-enroll.

A student must keep following his/her enrollment on every subject list in the course of all stages. If he/she finds his/her name below the line of students enrolled in the subject (**“NOT LISTED”**), it is possible that in due course a student will get onto the list (**“LISTED”**).

After stage I of enrollment is over, Group A subjects and elective study field subjects (Group C) with a small number of enrolled students might be removed from the list of subjects offered that semester. Please follow the announcements after this stage of enrollment.

The teachers cannot enroll or remove students from the study subject!
