

New Directions in Visas for Life Studies

A Memorial Symposium Honoring Simonas Dovidavičius

Sugihara House, maintained by Sugihara Diplomats for Life Foundation (est. 1999) has promoted the history of Visas for Life for many years. The knowledge of the act of humanity - issuing the visas for Jews, mainly Poles who were escaping from totalitarian regimes in 1940 by Chiune Sugihara, the Japanese consul in Kaunas, accompanied by Jan Zwartendijk, Dutch Honorary Consul in Kaunas, Lithuania was a humanitarian act, which is remembered until today in many countries. The exposition, "Visas for Life," presents unique moments of Chiune Sugihara and Jan Zwartendijk's life, stories of those who were rescued by them is greatly enriched by documents long preserved: photographs and passports from the personal archives of survivors' families. In recent years numerous researchers continue the archive queries, developing the story of the humanity chain, created by ordinary people and diplomats, including Tadeusz Romer, who helped the refugees to reach the safe destination, escaping from totalitarianism and death. In their research they also mention an important role of Sugihara and his legacy - building a bridge between Japan and other countries.

Simonas Dovidavičius, the previous director of the Sugihara House, encouraged many researchers to continue and present their research in this institution. The online event will honor Simonas Dovidavičius legacy, examining the new directions in Visas for Life research. Dovidavičius was always willing to develop and promote the knowledge about the Japanese consul Sugihara, Dutch Honorary Consul Zwartendijk and the refugees, who escaped from Nazi and Soviet occupied Europe and found help in Japan and then in Shanghai or another countries. Simonas Dovidavičius passed away on the 14th of December 2019.

"New Directions in Visas for Life Studies: A Memorial Symposium Honoring Simonas Dovidavičius "

Friday, February 19, 2021
10.00 – 12:00 CET (CET)
