

Cultural Heritage documentation solutions

EKA MUKOLA workshop

12.-16.06.2023

The need for high-quality digital heritage is especially apparent in the light of recent events, when GLAM (Galleries, Libraries, Archives, Museums) and other institutions dealing with a cultural heritage. As a vital asset for preserving the culture, languages, historical memory and the possibility to continue an high level research the cultural heritage should be accessible to all and all the time.

Modern Cultural Heritage documentation solutions offer a wide range of technical investigation methods, providing an opportunity to create high-quality digital content (resources) of cultural heritage with combining improved traditional and new and innovative methods and implementing these into the conservation and cultural heritage research workflow.

The summer school will consist of educational program and practical lectures:

- Cultural heritage and Architecture focusing on this particular site
- Sharing of international experiences
- Innovative methods of the documentation
- Technical investigation methods
- Photogrammetric Measurement
- Handheld Laser scanning
- Data processing & 3D modelling
- Final presentation and discussion

The workshop is aimed at students and specialists in the field of cultural heritage which are focused on CH documentation, preservation, and restoration. The students will get in touch with modern and innovative surveying methods that are used for documentation of cultural heritage (CH).

The summer school will consist of practical lectures and educational program.
